

Roji Health Intelligence Non-MIPS Measure Specification
RHI 6: Breast Mass Follow Up

Measure Description

The percentage of patients with a breast mass who are lost to follow up (i.e. do not have follow-up physician contact)

NQS Domain

Communication and Care Coordination

Measure Type

Outcome

Measure Numerator

No encounter or procedure after the office visit (with a diagnosis of breast mass) for at least 6 months

Measure Denominator

Female patients age 18 years and older

AND

Patient has had an office visit in the current or prior measurement year

AND

Patient has a diagnosis of breast mass

Denominator Exceptions/Exclusions

Denominator Exceptions:

- Patient reports receiving care elsewhere
- Patient refuses follow-up visit

Denominator Exclusions:

- Prior diagnosis of breast mass

Performance Calculation

For this measure, performance is calculated inversely, meaning that a lower performance rate indicates better care coordination
